

Press Release

Interturbine Group of Companies expands into power industry

Kaltenkirchen / Germany, June 2010

Interturbine Group of Companies – the partner of the aerospace and high tech industries - continues to expand.

Just recently the Interturbine Group has founded a new company: Interturbine-MES GmbH. Interturbine-MES develops and realizes comprehensive solutions in the area of control systems and energy distributions.

Thanks to many years of experience the Interturbine-MES employees have extensive competence in the planning, fabrication and commissioning of complete electrical systems for e.g. power stations, mains backup systems and compressor-plants.

Interturbine-MES offers everything a customer needs for a safe and efficient energy distribution:

- Low-voltage switch gears
- Medium-voltage switch gears
- Earthing systems

Visualization of processes using special, innovative software, the supply of components and replacement parts, repairs as well as support in emergencies complete Interturbine-MES's range of services.

The new Interturbine Group company consists of almost 50 employees and is based in Kaltenkirchen, Germany.

With Interturbine-MES GmbH the Interturbine Group is diversifying its business activities within the high tech industry by offering new services and products. There are a lot of positive synergies between Interturbine-MES and its sister companies within the Interturbine Group as the products and services to a certain extent are targeted to the same customer groups. Most of the Interturbine companies have a high affinity for e.g. diesel and gas generating sets and power stations, gas turbine plants as well as wind parks.
